

Wanderlust – Travel Listing Web Application

Name: MOHD ARBAZ KHAN

Reg No: 23BCE8723

1. Project Title

Wanderlust – Travel Listing and Accommodation Management System

2. Project Outcome

The objective of this project is to develop a full-stack web application that allows users to create, view, edit, and delete travel accommodation listings. The application provides a user-friendly interface for managing property information and stores data efficiently using MongoDB.

Outcomes Achieved

- Implemented complete CRUD (Create, Read, Update, Delete) operations.
- Developed dynamic web pages using EJS templates.
- Integrated MongoDB database for persistent data storage.
- Built RESTful APIs using Express.js.
- Designed responsive user interfaces using Bootstrap and CSS.
- Successfully deployed the application online using Render.
- Improved understanding of full-stack web development and MVC architecture.

3. Project URL

Application Link:

<https://project1-xsbe.onrender.com/listings>

Important Routes

- View Listings: /listings
- Add New Listing: /listings/new
- Edit Listing: /listings/:id/edit
- Delete Listing: /listings/:id

4. Tools Used and Versions

Tool/Technology Version

Node.js v22.x (or installed version)

Express.js v5.x

Tool/Technology Version

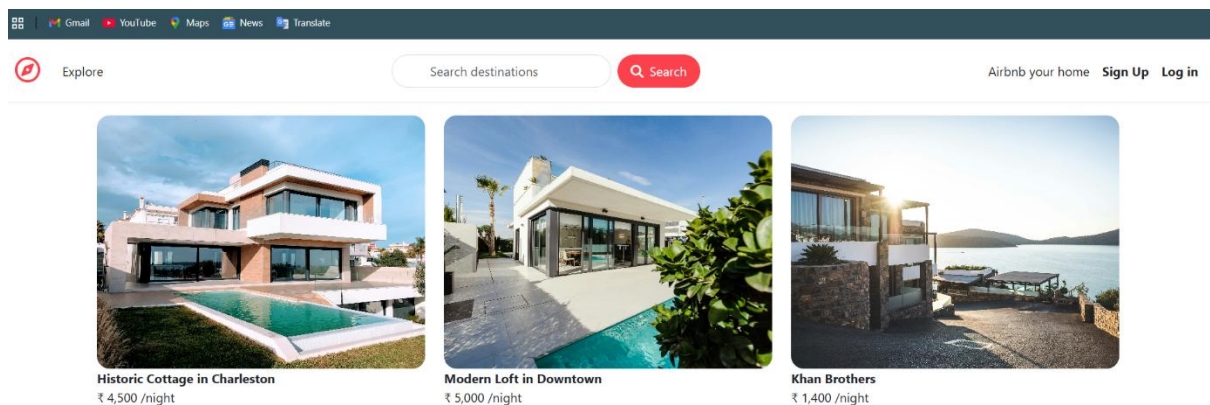

MongoDB	v8.x
Mongoose	v8.x
EJS	v3.x
Bootstrap	v5.x
HTML5	Latest
CSS3	Latest
REST API	REST Architecture
Render	Cloud Deployment Platform
Git & GitHub	Version Control

5. Output Screenshots with Explanation

Screenshot 1: Home / Listings Page

Description:

Displays all available travel listings stored in MongoDB. Users can browse available properties and view details.

Screenshot 2: New Listing Page

Route: /listings/new

Description:

Allows users to add a new travel listing by entering title, description, image URL, price, location, and country.

New listing

Location

Bangalore

Add

©Wanderlust Private Limited

As above Home page we have seen 3 listing now after adding this listing we can see this added in home now all became 4

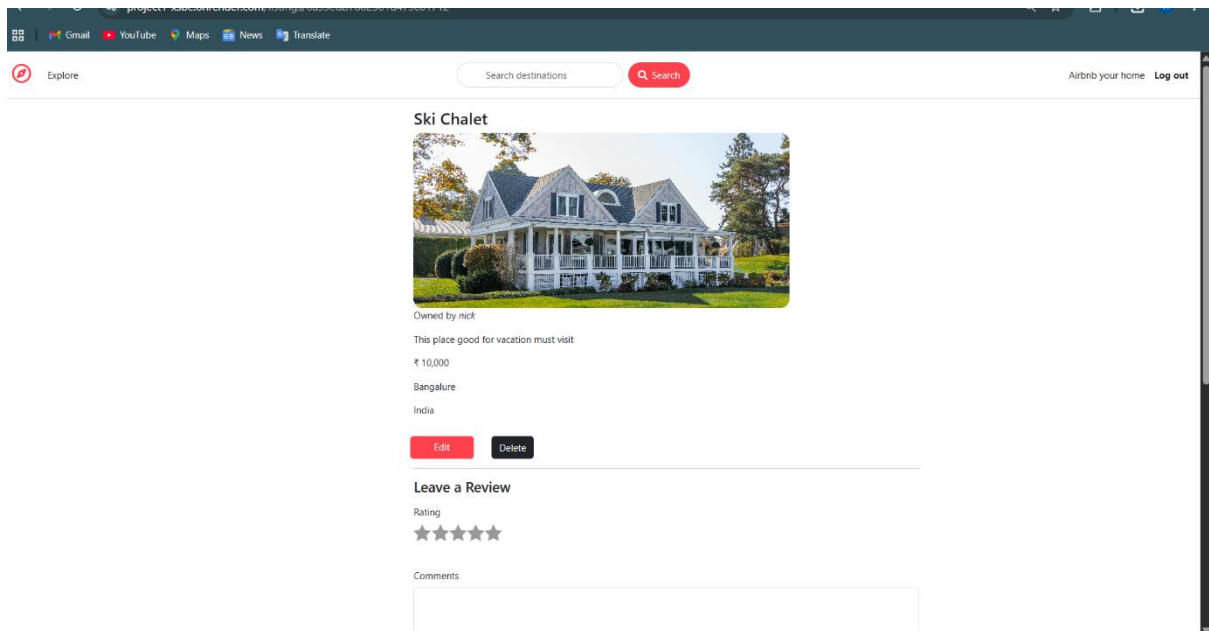

Screenshot 3: Listing Details Page

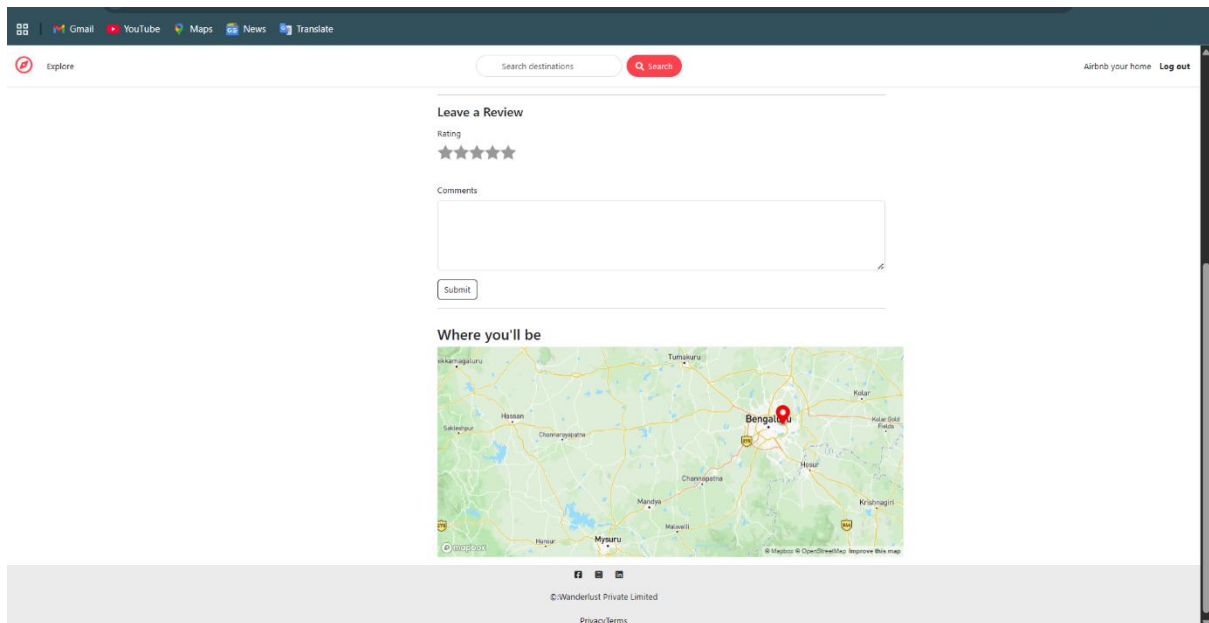

Description:

Shows complete information about a selected listing including image, price, location, and description.

This screenshot shows the details of recently added listing

User can give rating and leave comments so that others users can get to know about place,service,etc .I also added a **Mapbox API** to show listing location.

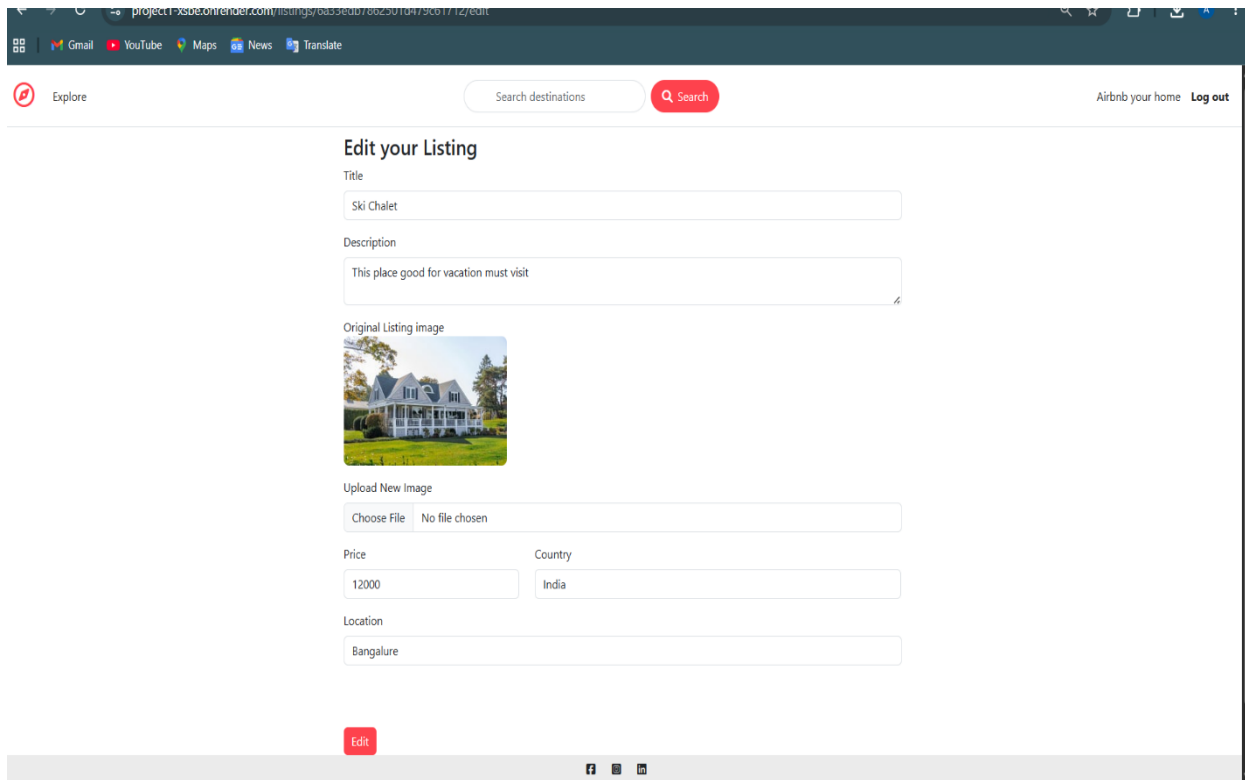

Screenshot 4: Edit Listing Page

Description:

Allows modification of existing listing information. Data is fetched from MongoDB and updated through Express routes.

I have updated the price of listing from 10000 to 12000 .Any one can check the previous price was 10000 but now the price has been updated to 12000.

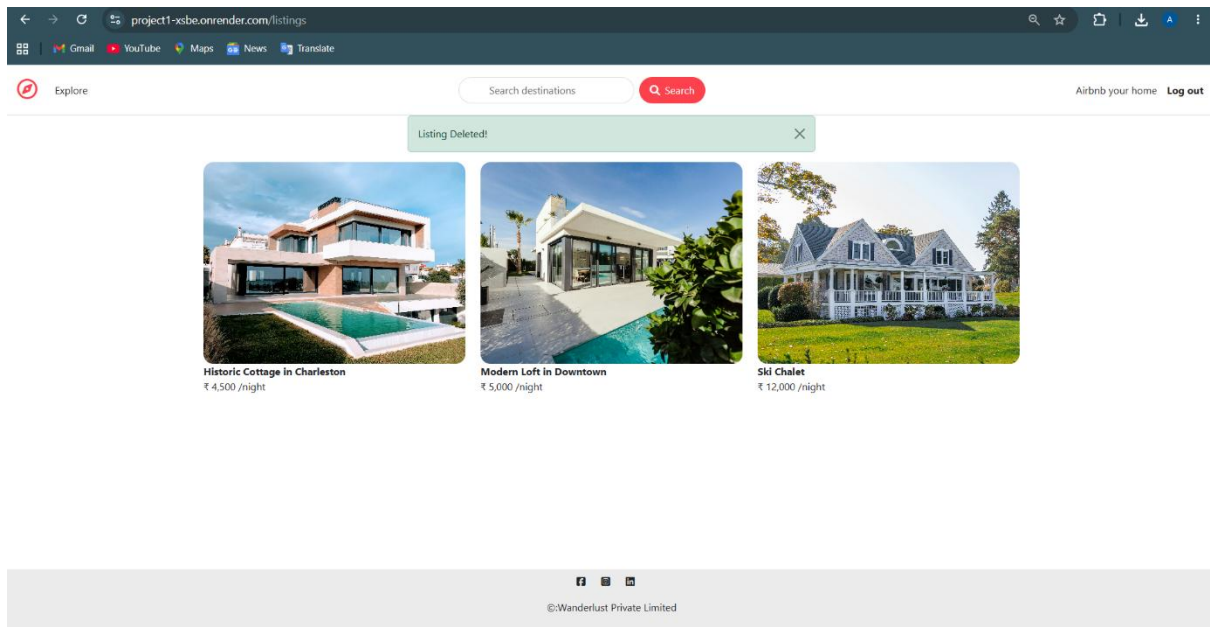

Screenshot 5: Delete Functionality

Description:

Users can remove unwanted listings from the database. The deleted record is permanently removed from MongoDB.

You can check out pop showing that listing has been deleted.

Screenshot 6: MongoDB Database

Description:

Shows the collection storing listing information. All CRUD operations are reflected in the database.

All Listings Data

The screenshot shows the MongoDB Cloud interface. The top navigation bar includes links to Gmail, YouTube, Maps, News, and Translate. The main interface is divided into three sections: a left sidebar for navigation, a central area for document viewing, and a right sidebar for metadata.

Left Sidebar:

- Data Explorer:** Contains 'My Queries' and 'Data Modeling'.
- CLUSTERS (1):** A search bar and a list of clusters. The 'test' cluster is selected, showing a tree view of collections: 'listings', 'reviews', 'sessions', and 'users'.

Central Area:

- listings:** The selected collection. It shows 'Cluster0 > test > listings'.
- Documents:** A tab showing 3 documents. Below it is a search bar with the text 'Type a query: { field: 'value' } or [Generate query](#)'.
- Buttons:** 'ADD DATA', 'BULK', and 'EXPORT CODE'.
- Documents List:**
 - Document 1:**

```
{
  "_id": ObjectId("68c94eda6ff7cc551dce1563"),
  "title": "Modern Loft in Downtown",
  "description": "Spend pend your days fishing and kayaking on the serene lake. This coz...",
  "image": Object,
  "price": 5000,
  "location": "Los Angeles ",
  "country": "United States",
  "reviews": Array (empty),
  "geometry": Object,
  "owner": ObjectId("68c94da46ff7cc551dce155c"),
  "__v": 0
}
```
 - Document 2:**

```
{
  "_id": ObjectId("68c8f32ac328d34bb268a4b2"),
  "title": "Historic Cottage in Charleston",
  "description": "Cozy retreat blending Charleston history with today's comfort",
  "image": Object,
  "price": 4500,
  "location": "Bangalore,India",
  "country": "India",
  "reviews": Array (1),
  "geometry": Object,
  "owner": ObjectId("68c7c67db878e8123f6182dc"),
  "__v": 1
}
```
 - Document 3:**

```
{
  "_id": ObjectId("68c7c6ddb878e8123f6182e3"),
  "title": "Khan Brothers"
}
```

Right Sidebar:

- Metadata:** Shows 'Cluster0 > test > listings'.
- Documents:** 3
- Aggregations:** 0
- Schema:** 0
- Indexes:** 1
- Validation:** 0

6. System Architecture

Frontend:

- HTML

- CSS
- Bootstrap
- EJS Templates

Backend:

- Node.js
- Express.js

Database:

- MongoDB
- Mongoose ODM

Deployment:

- Render Cloud Platform
-

7. Summary

Wanderlust is a full-stack travel listing platform developed using Node.js, Express.js, MongoDB, EJS, Bootstrap, HTML, and CSS. The application enables users to manage travel accommodation listings through CRUD operations. RESTful APIs are used to communicate between the frontend and backend. MongoDB stores listing data efficiently, while Render hosts the application online. The project demonstrates practical implementation of web development concepts including routing, database integration, template rendering, and deployment.

8. Conclusion

The Wanderlust project successfully demonstrates the development of a modern full-stack web application. Through this project, concepts such as REST APIs, Express routing, MongoDB database management, EJS templating, and responsive web design were implemented effectively. The application provides a scalable and maintainable solution for managing travel listings. This project enhanced practical knowledge of MERN-stack-related technologies and full-stack application deployment.
